DETAILED ACTION

1. Claims 7-24, 26-30, 32-34, 36, 37, and 39-61 are allowed. These claims have been renumbered as claims 1-51.
2. Claims 1-6, 25, 31, 35, and 38 has been cancelled.

Drawings

3. The drawings filed on September 12, 2003 are accepted by the Examiner.

REASONS FOR ALLOWANCE

4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "making the modified data assembly available for distribution to the first component; receiving second valuation information describing results of a second evaluation of appropriateness of distributing a second portion of the data assembly to a second component in the data management system; modifying the data assembly for distribution based on the second valuation information; making the modified data assembly available for distribution to the second component; distributing the modified data assembly to the first component; and distributing the modified data assembly to the

second component" as recited in independent claim 7 and similarly recited in independent claim 56.

As per claim 1, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "determining if distribution of at least a portion of a current version of the data assembly to a target component of the data management system is warranted based on the historical distribution information; making at least the portion of the current version of the data assembly available for distribution to the target component in response to determining that distribution is warranted; and distributing the portion of the current version of the data assembly to the target component" and similarly recited in independent claim 50.

As per claim 24, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "making at least the portion of the data assembly available for distribution to the first target component in response to determining that distribution to the first target is warranted; determining if distribution of at least the portion of the data assembly to a second target component of the data management system is warranted based on a comparison of the characteristic of the content with a characteristic of the second target component; making at least the portion of the data assembly available for distribution to the second target component in response to determining that distribution to the second target component is warranted" and similarly recited in independent claim 39.

The remaining claims, 2-9, 11, and 19-26, are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
